

Introduction to machine learning (lecture 3)

By/ Aly Maher Abdel Fattah

Lesson Outline

- *Case studies that use machine learning*
- *Using ML to predict a book's genre*
- *Using ML to detect spills*

Example1: House price prediction

Details:

- Room count
- Lot size

Model

House
Value

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Details:

- Room count
- Lot size

Model

House
Value

ML Task

Labeled Data

Supervised
Learning

Continuous Label
(Regression)

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Details:

- Room count
- Lot size

Model

House
Value

Dataset:

- Collected
- Explored
- Cleaned
- Visualization
- Split

# of Rooms	Lot Size (ft ²)	House Value (\$)
4	10,454	339,900
3	9,147	239,000
3	10,890	250,000
10	25,877	877,000

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Details:

- Room count
- Lot size

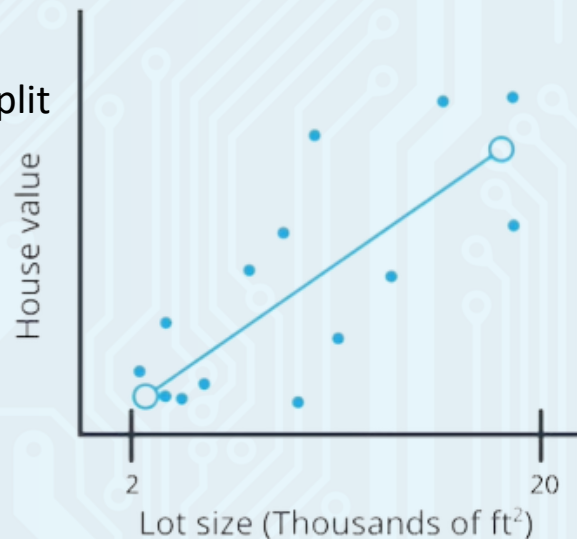

Model

House
Value

Dataset: Collected, Explored, Cleaned, Visualization and Split

Model:

- Linear
- Python M.L. libraries

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Details:

- Room count
- Lot size

Model

House
Value

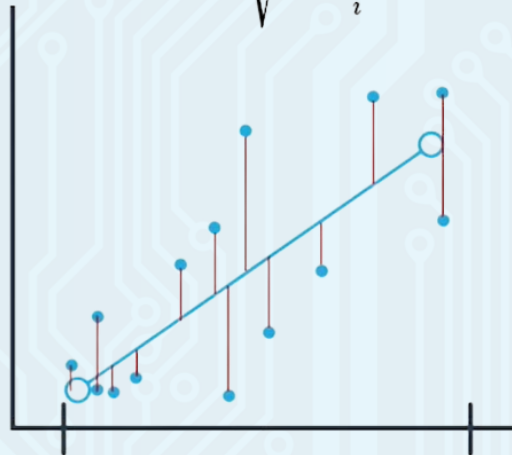

Dataset: Collected, Explored, Cleaned, Visualization and Split

Model: Linear

Evaluation:

- Root Mean Square (RMS)
- Manual Threshold Check

$$RMS = \sqrt{\frac{1}{n} \sum_i x_i^2}$$

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Details:

- Room count
- Lot size

Model

House
Value

Dataset: Collected, Explored, Cleaned, Visualization and Split

Model: Linear

Evaluation: RMS & Manual Threshold Check

Inference: Try your model with real data

Room count = 4
Lot size = 20,000

Model

\$435K

Example2: Microgenre Exploration

- Identify book trends
- Identify micro-genres

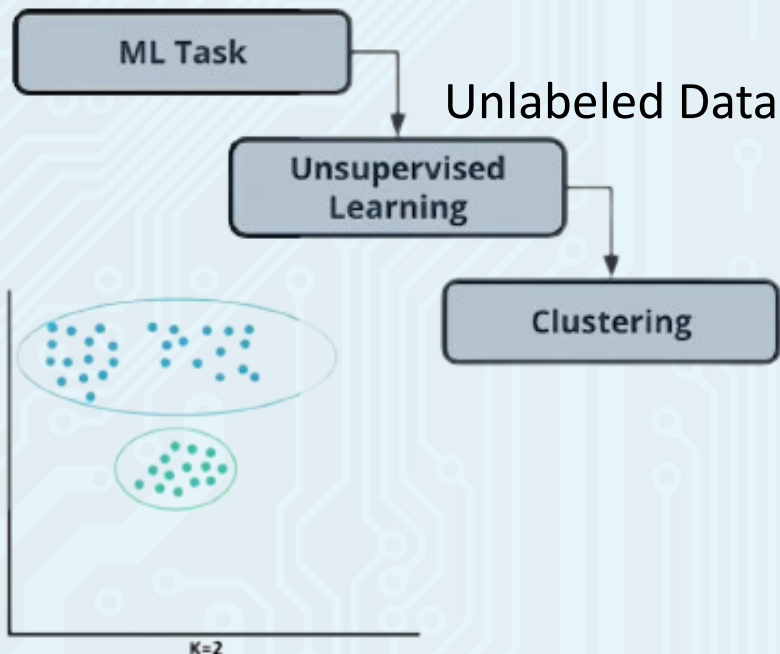

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Dataset (800 Romance books):

- Collected
- Explored
- Cleaned
- Vectorized (*transformed into numbers*)

"Little did he know, she was secretly a vampire."

↓
['little', 'does', 'he', 'know', 'she', 'is', 'secretly', 'vampire']

↓
Bag of Words

↓
[0, 0, 1, 0, 1, ...]

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

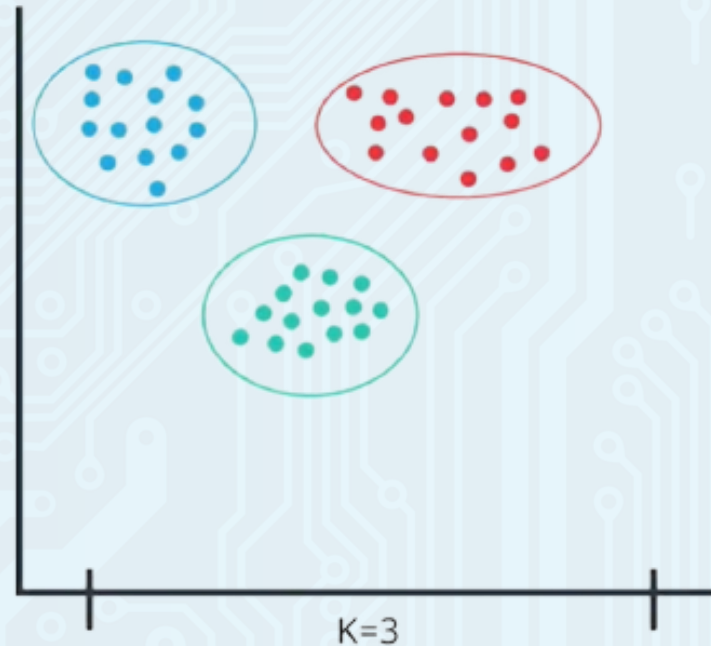

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Dataset: Collected, Explored, Cleaned, Vectorized

Model: k-means

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Evaluation metrics:

Silhouette
coefficient

Rand index

Mutual information

V-measure

Completeness

Fowlkes-Mallows

Contingency Matrix

Homogeneity

Pair confusion matrix

Calinski-Harabasz index

Davies-Bouldin index

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

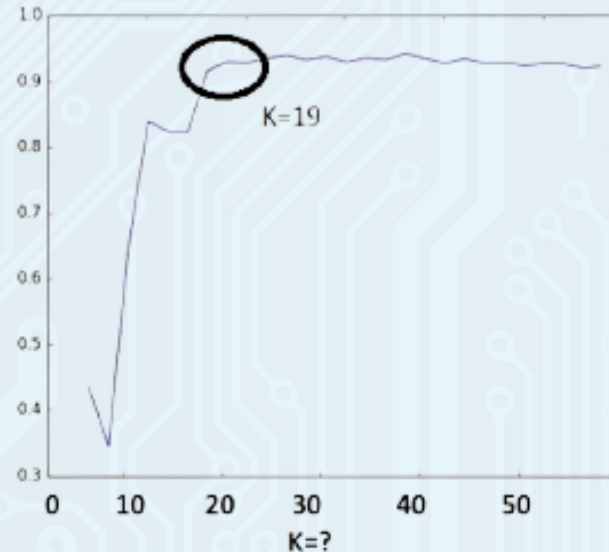

Dataset: Collected, Explored, Cleaned, Vectorized

Model: k-means

Evaluation:

- Silhouette Coefficient
- Manual Inspection

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Dataset: Collected, Explored, Cleaned, Vectorized

Model: k-means

Evaluation:

- Silhouette Coefficient
- Manual Inspection

Cluster Label	Book Description
7	"Susan's crush just moved away.."
7	"Can Gurpuran and Jorge keep their relationship together three hundred miles apart?"
7	"When Ali's fiance got offered a new job in New York..."

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Dataset: Collected, Explored, Cleaned, Vectorized

Model: k-means

Evaluation:

- Silhouette Coefficient
- Manual Inspection

Example3: Spill Detection From Video

- Fast response time needed
- Automated detection

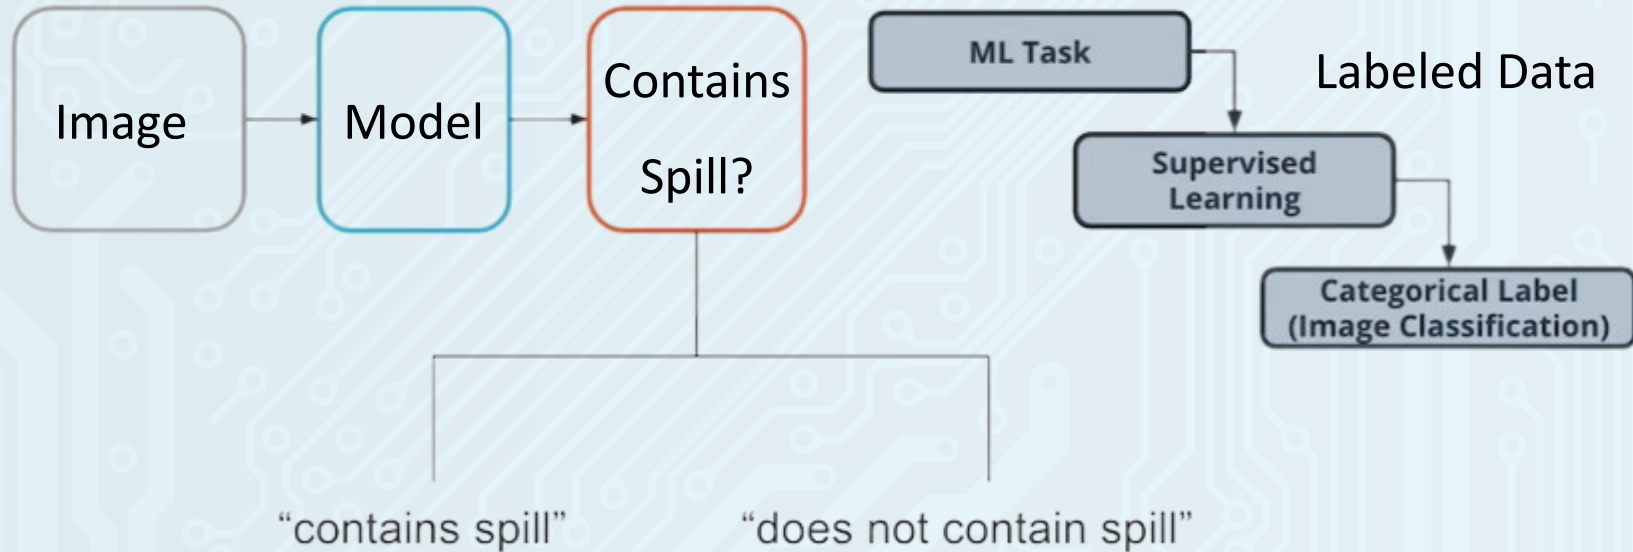

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Input layer Hidden layer Output layer

Dataset: Collected, Explored, Cleaned, Split,
and Vectorized

Model: Convolutional Neural Network (CNN)

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Evaluation Metrics:

Accuracy

Precision

Confusion matrix

ROC curve

Recall

False positive rate

False negative rate

Negative predictive value

Log Loss

Specificity

F1 Score

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

Step 5:
Use the
Model

Dataset: Collected, Explored, Cleaned, Split,
and Vectorized

Model: CNN

Evaluation:

- Value of “accuracy”
- Precision
- Recall
- Manual testing

Step 1:
Define the
Problem

Step 2:
Build the
Dataset

Step 3:
Train the
Model

Step 4:
Evaluate
the Model

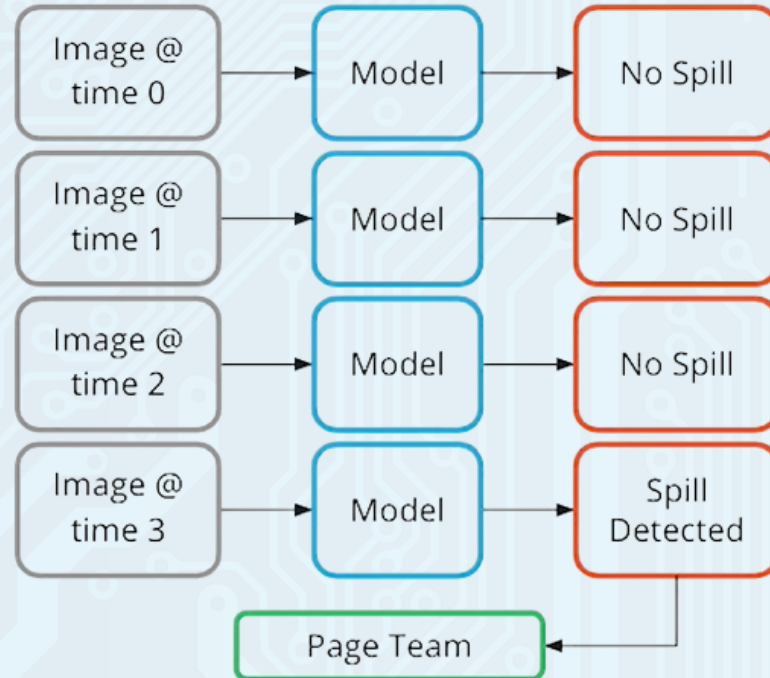

Step 5:
Use the
Model

Dataset: Collected, Explored, Cleaned, Split, and Vectorized

Model: CNN

Evaluation: Precision and Recall

Thank you
